

# WEBINAR

## Improving the Competencies of your Students around using Data Science?

May 8, 2019

11:30 am- 12:30 pm EDT

**NASPAA**50 YEARS  
The Global Standard in Public Service Education

# Data Science for the Public Sector

Laurel McFarland  
Julia Lane  
Sherry Glied

# Purpose

- Document the need for a new approach to data science that could be linked to NASPAA Schools
- Illustrate an example of how the pieces fit together
- Provide a suggested overview of data science competencies
- Discuss the potential role of NASPAA and/or a set of Deans/Schools in developing the new approach

# Why a new approach is needed

# Key points

- Public policy data has changed; schools need to change what we teach
- New opportunity with federal legislation and associated response
- Successful pilot approach could be tested or expanded
- Potential role of NASPAA

# Change in data

- Surveys

Ohio Longitudinal Data Archive – Data Summary

Dataset	Simple Description	Population	Data Provider	Units of Analysis	Update Frequency	Limitations/Notes
UI Wage by quarter by employer (Unemployment Insurance Wage Records)	Payroll earnings	Ohio workers	Ohio Dept. of Job and Family Services	Individual workers Fiscal quarter Wages per job per quarter	Quarterly	Excludes out-of-state employment and self-employed federal employees
RAPIDS (Registered Apprenticeship Partners Information Management Data System)	Registered apprenticeship records	Ohio residents who participated in registered apprenticeship programs and/or participants of Ohio-based registered apprenticeship programs	Ohio Dept. of Job and Family Services	Individual apprentices; Sponsors Service date	Annually	High incidence of missing IDs; requires non-deterministic matching to other datasets  Registered apprenticeships only.
HEI (Higher Education Information)	College student records	Ohio public college students	Ohio Dept. of Higher Education	Individual students; individual faculty/staff; courses Academic term	Annually	No out-of-state or private colleges  No ACT/SAT scores  Excludes not-for-credit courses
OTC (Ohio Technical Centers)	Vocational training records	Ohio Technical Center students	Ohio Dept. of Higher Education	Individual students Course dates	Annually	High incidence (~50%) of missing SSNs 2014+; requires non-deterministic matching to other datasets

Retail Partners

We now have partnerships with over 100 retailers for our retail tracking services. We monitor at the store level. This retailer network spans all major retail categories, including specialty stores, mass merchants, and big box retailers.

In exchange for sharing their store metrics, we provide our drive vendor negotiations and improve our consumer panel information sets, we provide our consumer panel information sets, we provide our consumer panel information sets.

Discover the difference our retail map can make for your products and services.

# Change in legislation

## H.R. 1831: Evidence-Based Policymaking Act of 2016

Introduced: Apr 16, 2015  
114<sup>th</sup> Congress, 2015–2017

Status: **Enacted — Signed by the President**  
This bill was enacted after being signed by the President.

Law: Pub.L. 114-140

Sponsor:  **Paul Ryan**  
Representative for Wisconsin, Republican

Text:  [Read Text »](#)  
Last Updated: Mar 18, 2016  
Length: 5 pages

- **2020 Census** (design, however on the new design)
- **CEDCaP (\$78M)**
- **American Community Survey** (continuing our efforts)
- **Geographic Statistical Areas** (smarter geographic areas)
- **Administrative Data** (and federally sponsored data linkage techniques for data protection, and privacy)
- **Economic & Geospatial Data** (are relevant to the Census Bureau)

## Foundations for Evidence-Based Policymaking Act of 2018

The bipartisan Foundations for Evidence-Based Policymaking Act of 2018 builds off the work of the U.S. Commission on Evidence-Based Policymaking to strengthen data privacy protections, improve secure access to data, and enhance the federal government's capacity for producing and using evidence.

### Strengthens Privacy Protections

**Maintains Strong Confidentiality Protections for Sensitive Data.** Reauthorizes the Confidential Information Protection and Statistical Efficiency Act (CIPSEA), an existing law that gives the American public strong privacy safeguards and legal protections for appropriate uses of confidential data.

**Institutes Processes to Assess Data Risks.** Strengthens efforts to protect confidentiality while making data accessible for evidence building and transparent to the public by requiring comprehensive risk assessments for certain publicly released data.

**Enhances Public Trust in Data.** Improves public trust in statistical activities by codifying language directing certain agencies to establish procedures to protect trust in data activities by appropriately maintaining objectivity, independence, and confidentiality.

**Establishes Consistent Leadership on Key Data Issues.** Ensures a senior leader in each agency is responsible for protecting privacy and ensuring confidentiality protections are appropriately applied by creating chief data officers.

### Improves Secure Data Access

**Encourages Agencies to Make Data Public and Open When Possible.** Takes steps to improve the public information about what data government currently holds and make data publicly available when possible and in the public interest.

**Requires Development of Data Inventories.** Enables

### Makes Administrative Records Available for Evidence Building

Under a strong set of confidentiality protections, encourages that government data can and should be used to generate evidence about policies and programs, unless otherwise restricted by law.

**Creates a Common Portal for Researcher Applications to Access Restricted Data.** Reduces burden on researchers for applying to access government data by establishing a common application system for qualified individuals to access restricted, confidential data for approved projects.

**Facilitates Continuous Feedback about Data Coordination.** Promotes the use of data for evidence building by establishing a government advisory committee to review existing coordination and availability of data.

### Enhances Government's Evidence Capacity

**Directs Agencies to Develop Evidence Plans.** Enables agencies to better prioritize evidence building by requiring that agencies document their key research questions, data needs, and planned activities.

**Prioritizes Evaluation Activities in Agencies.** Improves agency capacity to engage in and use program evaluation by establishing evaluation officers in government agencies and requiring agencies to develop written evaluation policies.

**Develops Baseline Information about the Resources Available for Evidence Building.** Directs government agencies to periodically assess and report on their capabilities to engage

**Research Facility:** The Research Facility is a pilot program that provides access to analytical and data services, and is designed for users, including government analysts and researchers. The Census Bureau developed the Research Facility as a collaborative Training and Analytics program sponsored by the Census Bureau, New York University, and the University of Maryland.<sup>1</sup> It is currently in a pilot program with users accessing the Research Facility through a training program. The Research Facility is based on cloud-based computing and data security approvals, and is designed to protect confidential information. The Research Facility is a pilot program of the Census Bureau, as well as other federal agencies, and an

# What Role for NASPAA Schools?

- Prepare current student for careers using administrative data for evidence building
  - NASPAA data competency
  - Both in the public sectors and in the non-profit sector
- But – data are available now and most current government employees do not have this capacity
  - Develop programs for current government employees (including alumni)

# Possibility...

- Can NASPAA Schools work together to develop an educational program that could function:
  - As a data science track within existing MPA/MPP programs?
  - As a stand-alone executive training program for current government employees?

# Necessary Components

## Technical

- Create secure environment where data providers can share their data across agency and jurisdictional lines and students (current MPAs or agency employees) can access the data under appropriate safeguards

## Create Curriculum

- Develop pedagogical tools to enable students to
  - Link and analyze disparate data
  - Learn to ask questions that available data can answer

## Value

- Document value associated with data
  - Consistent with NASPAA mission
  - Useful to participating external agencies

# Case Study – Coleridge Initiative

# A Model for Training Government Staff – Coleridge Initiative

## Technical

- Create secure environment where data providers can share their data across agency and jurisdictional lines
- Census Authorization to Operate; HHS and USDA in process

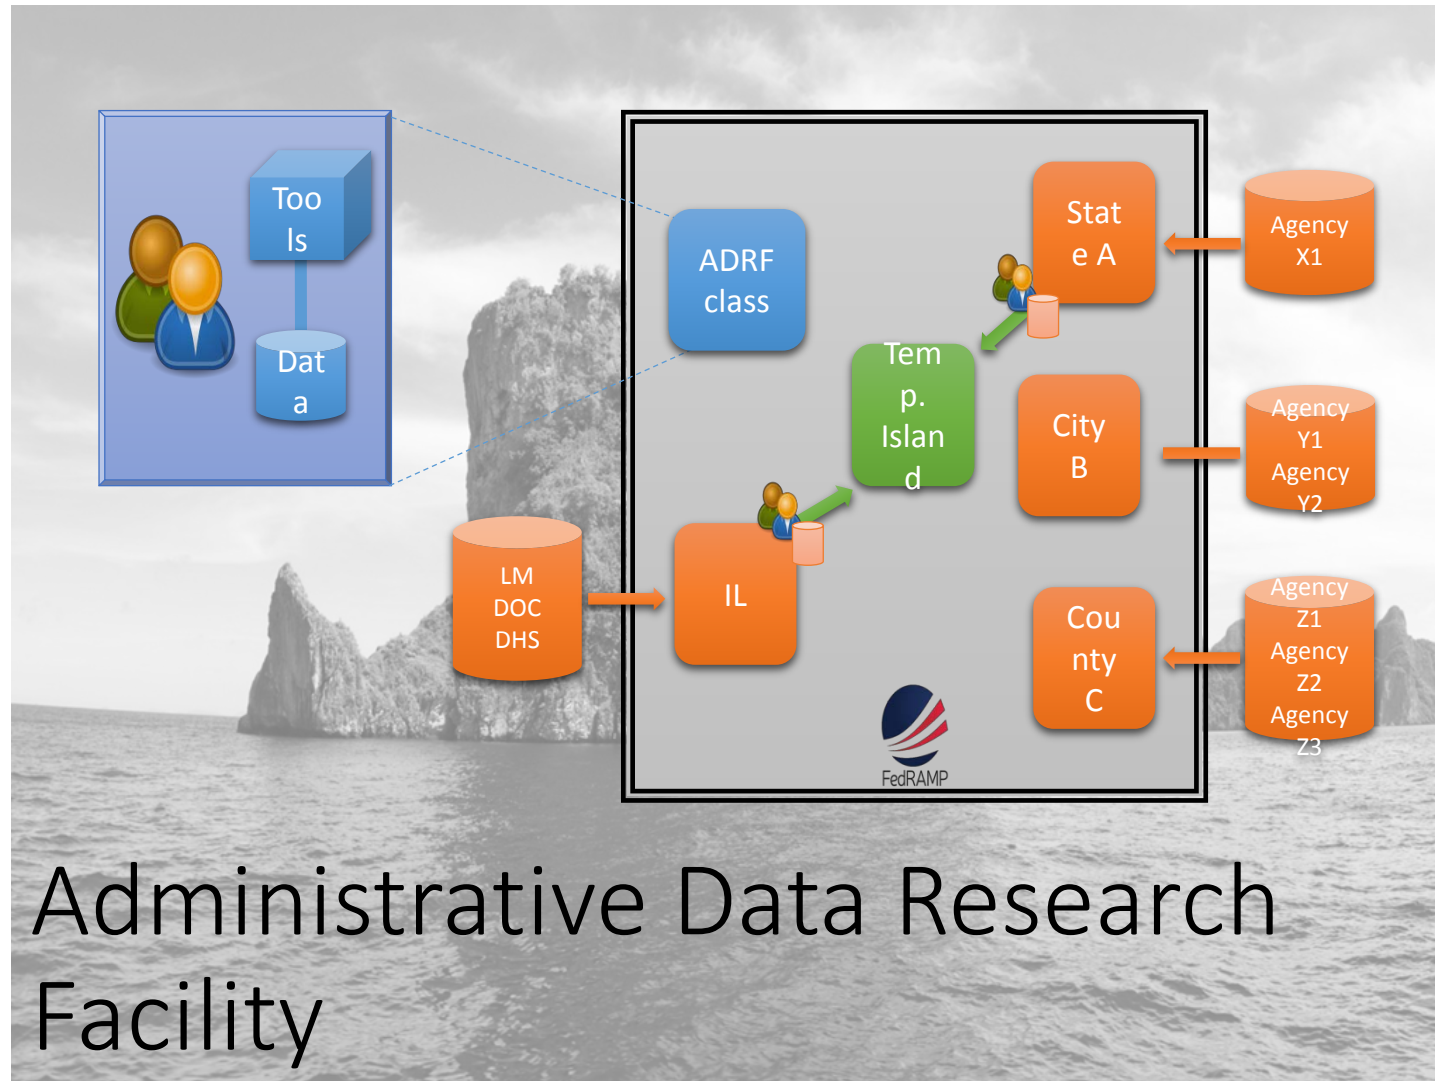

## Create Curriculum

- Link disparate data
- Analyze data
- Develop new analytical capacity

## Value

- Document value associated with data
  - Consistent with the agency mission
  - Useful enough to engage decision-makers

# Details

# Curriculum -- Textbook

“If you work in social science and would like to explore the power of big data, this book is clearly for you...This book is complete and comprehensive. It covers all necessary steps to finish a big data project; collecting raw data, cleaning and preprocessing data, applying various modeling tools to analyze the data, evaluating results, protecting privacy, and addressing ethical problems...All the important topics concerning big data are covered, making this book a good reference that you should always keep on your desk.” (2017) Book Reviews, *Journal of the American Statistical Association*, 112:518, 878-882, DOI: 10.1080/01621459.2017.1325629

THE UNIVERSITY OF  
CHICAGO

## Book Contents

Chapter 1: Introduction

### I. Capture and Curation

Chapter 2: Working with Web Data and APIs

Chapter 3: Record Linkage

Chapter 4: Databases

Chapter 5: Programming with Big Data

### II. Modeling and Analysis

Chapter 6: Machine Learning

Chapter 7: Text Analysis

Chapter 8: Networks: The Basics

### III. Inference and Ethics

Chapter 9: Information Visualization

Chapter 10: Errors and Inference

Chapter 11: Privacy and Confidentiality

Chapter 12: Workbooks

University of Missouri

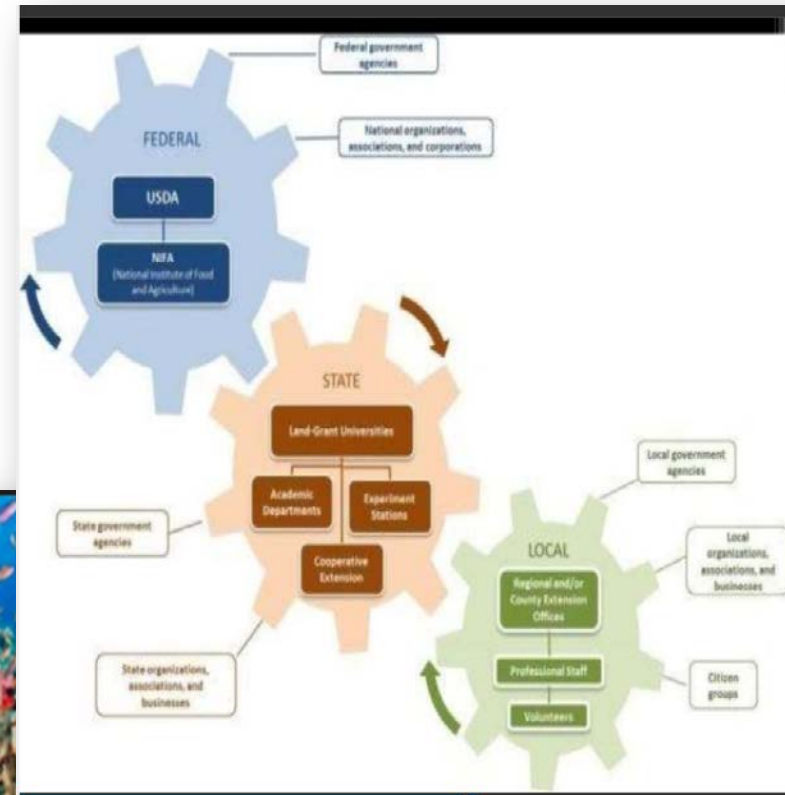

INDIANA UNIVERSITY

Standard in Public Service Education

# Broader Vision

# Key points

- Public policy data has changed; schools need to change what we teach
- New opportunity with federal legislation and associated response
- Successful pilot approach could be tested or expanded
- Potential role of NASPAA

# Moving Forward- Potential Role of NASPAA

# Opportunities for NASPAA Schools

- Develop a framework for establishing and maintaining a secure facility to access confidential data
  - Identify and address challenges
  - Offer case studies of success
- Collaborate on curriculum/pedagogical models
  - Develop shared pedagogical learning environment, case studies etc.
  - Leave explicit space for local experimentation and modification
- Establish evidence of value
  - Develop evidence-based paradigm for assessing value of these efforts both in MPA/MPP programs and in executive programs

# Questions for the Group

- Is there interest in pursuing this agenda as a collective enterprise?
- Next steps would be to develop background white papers on technical aspects, pedagogic aspects, and evaluation aspects and discussing at NASPAA meeting in October
  - Are these the correct topics?
  - Would you be interested in participating in the development of the White Papers (as a reviewer/editor)?
  - Would you be interested in attending a meeting to discuss the papers at NASPAA?

Thank you
